Here Are the Facts On the School Bond Issue

In March of 1951 a committee of outstandingly successful school men met and recommended certain school building needs to the people of Bulloch County. This event was the result of a study made by the people of their total school program over a period of many months. In 1950 the negro citizens of the city of Statesboro and Bulloch County had petitioned the board of education for adequate building facilities. The city and county boards of education met together and asked for the above mentioned study to be made. Committees in every school area were organized to study the type of program necessary to satisfy the needs of all boys and girls. These committees gathered data on population and population trends on the tax system and other necessary information. After carefully studying the data and visiting the schools the committee made the following recommendations:

1. The city and county systems should merge into one system.
2. Consolidate Leefield with Brooklet.
3. A new high school should be built on a new site to accommodate the Brooklet, Stilson and Nevils High School pupils, so that a broader curriculum could be offered.
4. Brooklet, Stilson and Nevils elementary schools should remain at their present locations.
5. Warnock School should be consolidated into the Laboratory School.
6. Middleground should be maintained for the present as an elementary school.

7. Portal should be maintained as a permanent elementary school. The high school should be maintained if statistics in the next three years show that high school enrollment is increasing.

8. Register High School should be consolidated with the Statesboro and Laboratory Schools. The elementary school should remain if enrollment is stable.

9. Westside elementary and high school grades should be consolidated with Statesboro. Elementary pupils should continue at Westside until space is provided in Statesboro.

10. The Statesboro Schools should have much more space. Land might be secured by buying negro houses adjacent to school grounds. The gym floor needs replacing. Science and home-making laboratories and shops need extensive remodeling. Two elementary schools with adequate playground space should be built to accommodate the increasing enrollment in Statesboro.

The County Board accepted these recommendations and immediately took steps to implement them. By the spring of this year (1956) we had accomplished this much of the proposed program:

For the Negro Citizens

All old wooden buildings had been abandoned and all negro children were housed in new modern buildings except the 1st and 2nd grades of William James. That building has had extensive repairs. This part of the program has cost the following:

Four New Elementary Buildings:	
New Hope	\$ 88,000.00
Nevils	94,000.00
Brooklet	163,000.00
Willow Hill	195,000.00
One central high school	430,000.00
Repairs on old William James	10,000.00
TOTAL	\$980,000.00

For the White Citizens

Two new elementary schools have replaced the old elementary school in Statesboro and one high school has been built in the southeastern part of the county. Warnock, Leefield and Westside elementary schools have been consolidated as recommended. Register High School has been brought into the Statesboro and the Marvin Pittman Schools. This has resulted in a broader curriculum at a cheaper per pupil cost of operation. The following is the amount spent on building needs for white children:

1. Two elementary schools in Statesboro	\$500,000.00
2. Southeast Bulloch County High School	265,000.00
3. Additional wing to Portal	143,000.00
4. Flooring to Statesboro High School Gym	5,000.00
5. Repairs to Statesboro High School (1956)	10,000.00
6. Bought negro property adjacent to Statesboro High School	6,000.00
7. Renovation and equipment Statesboro High School homemaker laboratory	3,000.00
8. Equipment for Statesboro High School Science Laboratory	3,800.00
TOTAL	\$935,800.00

For both negro and white children we have spent \$1,916,300.00 or approximately \$2,000,000.00; and we have \$100,000.00 in the building fund. Yet the people of Bulloch County have not spent one cent of extra tax money for schools during this period.

This has been accomplished through the State School Building Authority and a Bulloch County School Bond issue. After the merger of the city and county systems the people voted for an \$800,000.00 bond issue. The next year the State set up the State School Building Authority which enabled the counties of Georgia to borrow money to finance school buildings.

The Minimum Foundation formula provides \$138,900.00 to Bulloch County annually for capital outlay. This is being used to pay off the indebtedness. \$104,000.00 annually goes to the School Building Authority and \$34,900.00 is used to retire the local bond issue.

The shift of population in Bulloch County has progressed at greater pace than was anticipated in the 1951 survey. For instance, it was recommended that the two Statesboro elementary schools would need eleven classrooms each; fourteen were built, and within two years additional space was needed.

Realizing that this shift had created additional problems, last spring the county board invited the same committee with a few changes to make a re-survey of the building needs. To complete building facilities for a modern educational program the committee made the following recommendations:

For White Schools

1. The construction of a complete new high school in the central Bulloch County area for approximately 500 pupils.
2. Conversion of the present Statesboro High School for a Junior High School to relieve overcrowding of elementary schools in Statesboro.
3. Improvements should be made at the Brooklet, Nevils, Stilson elementary schools which will completely modernize them. Any school in which an adequate educational program can be maintained should be modernized.
4. Make limited improvements at Portal Elementary and High School.
5. Construct music and physical education facilities and provide additional space for agriculture at the Southeast Bulloch County High School.

Estimated cost—\$750,000.00.

For Negro Schools

1. Provide in new construction self-contained primary rooms as an addition to the new William James center for the pupils being provided for on an immediate basis at the original William James Center. This will be cheaper than modernizing the old building.
2. Provide a combination auditorium-physical education building to complete the plan for a modern high school program at the new William James center.

Estimated cost—\$150,000.00.

Tax Digest for Statesboro and Bulloch County

1951	\$12,000,000.00
*School Bonds (1951)	800,000.00
1956	13,612,879.00
Capital Outlay (from State)	138,900.00

Out of the capital outlay we pay to the Building Authority \$104,000.00, and to retire *County Bond \$34,900.00. We pair four (4) years on above (30-year bonds) without any extra tax to the people.

To complete the building program as recommended \$800,000.00 is needed. Under the constitution a county board cannot issue over 7% of tax digest. This was done in 1951 although no new tax was passed to meet the payments. The increase in the present digest won't permit the amount needed.

The county board and county commissioners have investigated ways to solve the problem. It is recommended that the county digest, except tax on personal property, be doubled or raised to \$20,000,000.00 or \$22,000,000.00 and the millage be lowered in proportion and add 2 3/4 mills to raise the \$55,000.00 needed to meet the new bond issue.

This actually would equalize the tax load more than the present structure.

School Bonds Taxes And You

(Continued from Page 1)
that unless some provision is made to relieve over-crowded school rooms immediately in the areas recommended that double sessions are upon us now. To consider that school plants built decades ago can continue to give adequate room and facilities to our youth is to close our eyes to the truth. Population trends, new courses and techniques of instruction to include shop and certain agricultural phases of the school program need and must have adequate facilities.

WHY MUST THE BOND ISSUE BE THIS LARGE?

The Board of Education serves the entire county. Any proposal to complete the school building needs for Statesboro alone would fail to obtain the support of rural districts in which the total county program is still incomplete. Therefore, the board feels that a single issue large enough to complete the original plan for furnishing a complete school service in every part of the county is the only fair proposal.

TION OF BULLOCH COUNTY LARGER?

The school age population of Bulloch County, as a whole, leveled off somewhat in 1955. However, shifts in population have been toward the urban centers. The school-age population of Statesboro continued to grow despite this leveling off in total enrollment.

WILL THE BUILDING OF A HIGH SCHOOL BUILDING IN STATESBORO BRING ABOUT THE CLOSING OF OTHER COUNTY SCHOOLS?

On this important point, the

Bulloch County Board of Education makes the following emphatic statement: "No. There is no plan in the minds of the board to close any school now operating in the county." So long as there are elementary pupils in any district to attend, elementary centers will be operated as at present. A satisfactory elementary program can be furnished for a much smaller number of elementary pupils than high school pupils.

With the completion of the existing high schools at Portal and at Southeast Bulloch, adequate programs will become available to every high school pupil in the county. The elementary facilities now in use, with minor modernization and improvements are adequate. Statesboro's high school does not permit an adequate modern high school program.

HAS THE CONSOLIDATION PROGRAM PRODUCED THE NEED FOR THE BOND MONEY?

The consolidation program now completed in Bulloch County has almost nothing to do with the present need. The Statesboro High School has been incapable of providing a satisfactory and up-to-date high school program for many years. However, when the State School Building Program got under way, the rural needs were far greater than those in Statesboro.

The school board has seen fit to provide for the greatest needs

sale. Unless a tax digest is sufficient to induce confidence, the county is forced to pay exorbitant rates of interest to sell its bonds. Actually the digest in effect represents collateral and makes the bonds negotiable and the legal limit of 7 per cent of the digest cannot be exceeded in the issuance of bonds. Therefore the election will actually do two things. It will authorize doubling the tax digest on real property only (does not include personal property) and will also levy a 2 3/4 mill additional school bond levy. Plans then call for reducing the millage rate to a figure that will return the same approximate income.

Here! New Task-Force 57 Chevrolet Trucks!

Performance-proved in a history-making test on the ALCAN Highway to Alaska

FIRST WITH THE MOST MODERN FEATURES!
New 283-cubic-inch Taskmaster V8 delivers 160 high-torque horsepower. Standard in Series 5000, 7000 and 8000, optional in Series 6000 at extra cost. Horsepower ranges up to 210 in Chevrolet's complete line-up of modern V8 and 6-truck engines.
Revolutionary Powermatic Transmission—exclusive with Chevrolet! This six-speed automatic, designed specifically for heavy-duty hauling, is an extra-cost option in Series 5000 and 4000 and all heavy-duty truck models. Hydra-Matic is offered in 3000 and 4000 Series models at extra cost.
New 1957 work-styling gives Chevrolet trucks an even fresher, flatter appearance. There are three different and distinctive styling treatments.
L.C.F. models outdate the C.O.E. because they're lower, handier, easier to get into and out of, and save time in routine engine maintenance. Yet they offer all the traditional C.O.E. advantages.
Heavyweight Champs with Triple-Torque tandem are rated at 32,000 lbs. GVW, 50,000 lbs. GCW. And Chevrolet's advanced tandem axle unit offers a built-in three-speed power divider—plus a unique "self-steering" action that reduces tire wear and increases handling ease to your job.

Alcan fleet gets up to 18.17 miles per gallon! That's the mileage reported by the Canoe Carrier, with Thriftmaster 6 and extra-cost Overdrive.

All the way in DRIVE range! This Powermatic-equipped 10000 Series tractor traveled the entire Alcan Highway in a single forward-speed range.

Only franchised Chevrolet dealers display this famous trademark
